Subject: **Administrative Inactivation of State Operating Permit No. SOP-09062**
Allied Waste Services-Pulaski Transfer Station
Pulaski, Giles County, Tennessee

Dear Mr. Doyen:

This letter is to inform you the Division of Water Resources (the division) is administratively inactivating the above referenced permit effective the expiration date of the permit (April 30, 2015). The permit authorized operation of a pump and haul sewerage system to serve employees of this waste transfer facility located at 264 Maxwell Hill Road. According to data available on the world wide web, the facility property belongs to the City of Pulaski. The permit authorized the arrangement whereby domestic sewage from facility employees would be transported via licensed septage hauler to the City of Lawrenceburg STP for treatment.

Division staff spoke with Mr. Jernigan last week who relayed that the facility would cease to operate after April 30, 2015. Division staff visited the site today and found the site gate locked and the entrance sign for the former business covered to disguise its content.

In order for a sewage system to be operated at this site in the future, it will be necessary to comply with the engineering, planning and design and permitting regulations of this department.

We appreciate the opportunity to have served you in the past. If you have questions, please contact the Columbia Environmental Field Office at 1-888-891-TDEC; or, at this office, please contact Mr. Wade Murphy at (615) 532-0666 or by E-mail at Wade.Murphy@tn.gov.

Sincerely,

Vojin Janjić
Manager, Water-Based Systems
